EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: non-elected claims 19-47 have been canceled per MPEP 821.02.

The following is an examiner's statement of reasons for allowance: the claimed through drying web apparatus comprising an open spaced cylindrical deck permitting airflow positioned around a support structure with a support shaft including the feature of a bearing being located so that there is substantially no moment transfer between the cylindrical deck and the support structure is not found in the prior art either singly or in combination. The closest prior art is considered Justus (US 3,273,492) in view of Komuro et al. (US 5,732,319) which discloses a perforated suction roll shell subjected to a bending moment and biasing means of a heated roller respectively which is considered patentably distinct over the claimed invention and its included feature. This patentable distinction is found in the sole independent claim 1. Other prior art references cited with this action are considered to disclose one or more of the claimed elements, but like the closest prior art, lack the motivation for obviating the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
